## Possible Future Jobs

### Game Programmer

A game programmer are software engineers, programmer or computer scientist who creates codes for video games and software for new game development tools. The term game programmer has a lot of different disciplines but they are completely different compared to game designer.

### Software engineer

A Software Engineer troubleshoots for problems the whole software, document it and they look for feasible solutions to resolve the problems.

## Computer Hardware Engineer

Computer hardware engineers are the ones who develop, test and design all the hardware in the computer like the circuits in the computer, mouse, keyboard and more.
